

Building an Extranet with Forms-Based Authentication using WSS 3.0/MOSS 2007

by RDA Senior Consultant Deepak Gupta

In late 2007, RDA Senior Consultant Deepak Gupta delivered a presentation to the Philly.NET user group on leveraging ASP.NET's Provider model to build Forms-based Authentication in a SharePoint site and roll out an Extranet to your customers, contractors, etc.

Deepak Gupta is a Senior .NET Consultant for RDA Corporation. He has over 15 years of experience in developing software with Microsoft Technologies. For the past several months, he has been heavily involved with designing, implementing and maintaining solutions with MOSS 2007, Office 2007, WSS 3.0 and ASP.NET 2.0. He is originally from Mumbai, India and currently resides in Exton, PA.
