

Visual Studio 2005 Tips and Tricks

by RDA Software Engineer Steve Andrews

Based on real life experience of 8+ hours a day developing with Visual Studio 2005, learn some sweet tips and tricks to tame the IDE. With something new for everyone, these techniques will give you valuable information to start using right away, increase your productivity, and make you wonder how you survived all this time without them.

Steve Andrews is a Software Engineer with RDA Corporation with over 8 years of experience implementing custom Microsoft solutions in the Financial, Medical, Manufacturing and Retail industries. Steve is also an MCP, ICSSO, and .NET fanatic. You can visit his blog at www.dotneticated.com.

To download the content from the presentation including a draft version of Steve's E-Book entitled **Tame the IDE: Visual Studio 2005 Tips and Treats**, please visit:
